

Ashley Engineering is an independent family owned business established in 1961. We manufacture precision quality pressure diecast and gravity diecast components from our fully equipped facility whilst meeting exacting standards of quality and customer service.

We have been providing a reliable service to a loyal customer base in a wide range of industries for over five decades. Situated in the heart of Lancashire (UK) close to the motorway network of the M62, M6, M65 and M66 we deliver to customers throughout the UK.

With over fifty years experience we offer the combination of Zinc and Aluminium diecastings from our foundry together with bespoke tool design and manufacture along with our comprehensive in-house finishing facilities including **Powder Coating**

Contact us today and find out how we can help your business grow.

Powder Coating Specialists

Ashley Engineering

“The quality of work and customer service is far better than our previous supplier. I would definitely recommend Ashley’s for Powder Coating. They worked with us to match our bespoke branding with great results.”

Purchasing Manager – Solomon’s Commercials

“Ashley’s Powder Coating far exceeded our expectations. They have now supplied 1000’s of parts saving us time and costs in our supply chain. The quality of the finish is totally consistent with our customer’s requirements.”

Managing Director – Ascotex Group.

Approved suppliers to a wide range of industries.

We are approved suppliers to many leading companies and the supply chains of MOD and Aerospace, Electrical, Lighting, Valves & Pumps, Automotive, Construction and the Food & Beverage industries each demanding exacting standards of quality.

Accredited to ISO-9001:2008

Comprehensive Finishing Services

PRETREATMENT.

We use a five stage cleaning and degreasing process using leading brand chemicals and detergents to ensure the best possible finish.

Steel parts are bead blasted in preparation, whilst alloy castings are de-gassed at 200c in the oven following five stage chemical de-greasing cleaning process.

8186

ISO 9001: 2008

“Our products are sold to Customer’s who demand a perfect finish. Ashley’s powder coating is superior to any of the suppliers we have used so far and have helped to improve our reputation.”
MD at No-Go Security Products

CONVEYOR.

Our conveyor track system is ideal for minimum handling with 380 positions holding 100’s of components.

LARGE BOOTH.

Far larger items, one off’s or samples we have a manual unit 5m x 3m x 4m which can accommodate items not suited to the conveyor.

CHOICE OF COLOURS

A choice of colours is available conforming to the classic RAL system. We also can match bespoke design colours to suit your branding.

WIDE RANGE OF FINISHES

Using industry leading materials we offer a variety of finishes. From traditional smooth matt and gloss for industry to more specialised leatherette or fine texture. Metallic’s for alloys in sparkle or gunmetal, the new wrinkle finish or clear cut gloss & matt. We can also do Polyester Epoxy gloss and low bake. The newly launched Candy Colour range with a choice of Red, Blue & Purple.

DOMESTIC APPLICATIONS.

We also do garden furniture, radiators, shop fittings, cycle and car parts, motor cycle and furniture fittings.

- reliable service
